TITANIUM EXHAUST SYSTEM

MOTO CORSE Evoluzione exhaust system provides best performance enhancement, reduced weight and top quality craftsmanship for the most serious enthusiasts. Our highly trained and experienced professional engineers emphasize design concepts to be "first in the market innovation".

All MOTO CORSE products are perfected by dedicated experienced engineers and never mass produced. MOTO CORSE also understands that there is no compromise for the most demanding enthusiasts and every manufacturing process are fully compliant to our detailed attention to design, quality inspection & controlled process management.

MOTO CORSE is an official special parts supplier for MV AGUSTA & BIMOTA.

BILLET BRAKE RADIAL MOUNTS

Ducati

Moto Corse brake radial mounts are crafted by precision machine tools as shown, the caliper mount is "box" type precision tooled from single ERGAL 7075 solid piece.

The result: performance, reduced weight, quality and beauty unmatched by none used extensively in moto gp as standard technology Moto Corse delivers moto gp technology for the ultimate performance.

The kit is available for caliper with bolt distance 108mm or 100mm and includes all the parts to assemble it on the bike.

COD.	DESCRIPTION	BIKE MODELS

RIDING STEP SET

High quality 3D machined worked riding step sets. Fixed mount step bar with adjustable pedals provide positive feel while maintaining original standard shift pattern (also available in reverse shift for Ducati bikes). the kit includes titanium fasteners & bolts as standard specification.

MOTO CORSE step kits for F4 and BRUTALE feature adjustable positions. Standard position is at 10mm reward and 10 mm upward. MFJ compliant block pattern on the steps are manufactured to strict quality control.

The latest step kit includes step bars compliant to the racing regulations. The step bars are rounded with caps. Machine worked step bar feature machine ground intricate block patterns to optimize grip, control and stability

Brakes and shift pedal mount with non-lubricated dry bushing for the optimal shifting and durability..

All steps for the brakes and shift pedal bars incorporates adjustable off set mechanism thus making position adjustments at your optimal needs

WATER COOLER RADIATOR

The rational design of radiators to meet the requirements of maximum cooling capacity with minimum head resistance and minimum weight under the velocity, pressure, and temperature conditions met with in flight requires considerable fundamental information regarding the laws of air flow and of heat dissipation in the honeycomb air-tube and vertical flat water-tube types of radiator construction used to-day. At the start of the investigation practically none of this information was available although recently received reports of the British and French commissions have added much that is of value

SBK WATER COOLER RADIATOR

Moto Corse has a beautiful hand made, all aluminum, 40 mm thick, single core design, Super Cooler Radiator, that will drop right in to the standard radiator mounts, and connect right up with all the standard hoses and fuses, providing a massive increase in surface area by which the hot engine water can dissipate its heat. An increase of more than forty percent of cooling surface area over the stock radiator is granted you with this simple drop in installation.

COD.	DESCRIPTION	BIKE MODELS
104116006	OWERSIZED WATER COOLER RADIATOR	MV AGUSTA F4 1000

TITANIUM PROTECTION SCREENS FOR WATER AND OIL COOLER RADIATOR

CARBON COMPOSIT SERIES

Carbon composite materials are often used purely for esthetic purpose amongst many manufacturers. Not so with MOTO CORSE STANDARD. We craft components and parts with carbon composite material not only for its appearance, but for total performance. MOTO CORSE's carbon composite materials are manufactured to meet highest quality standards utilizing high temperature/pressure "dry carbon" manufacturing process. MOTO CORSE STANDARD is our passion for pursuing excellence and commitment for developing the highest standard products

DUCATI DRY CARBON CLUTCH PROTECTOR

ENDURANCE Type, original design for DUCATI accents your machine and yet functionally provides maximum protection by using light weight dry carbon material. Unlike many carbon clutch protectors replicated from standard steel covers, MOTO CORSE clutch protectors are completely redesigned for rigidity and maximum structural integrity.

Available in two different heights: 38mm for racing slipper clutch and 44mm for genuine clutch.

CORSA Type models have wide front opening for increased cooling ventilation for the clutch. At the same time, the protector is reinforced for extra strength and durability for maximum protection from damaging the clutch.

Clutch protectors for DUCATI are available in black carbon fiber material or silver Texalium material, a high performance carbon fiber/aluminium hybrid fiber twill.

TUBULAR STEEL SWING ARM KIT

The tubular swing arm is made TIG-welded tubular cromoly steel material. The material retains high rigidity yet maintains the best balance, stability and integrity for the most demanding run. Our swing arm design also compliments the Ducati "look & feel" fitted together with aluminium eccentric chain adjuster, carbon mud guard and dedicated axle. The fittings are "bolt on" to meet Ducati specific standards allowing compatibility with other after market components. Available for all Ducati Monster with genuine swing arm after 2002. Available color: Red and Black or under request.

MAINTENANCE EQUIPMENTS

INDOOR BIKE COVER

MOTO CORSE understands that protecting and storing your investment is just as important part of keeping your machines in mint condition. Our protection covers are inner lined with special material which do not leaving markings nor fine scratches. The material is also "breathes" thus helps preventing moisture build ups. The fine material liners are static free prevents dust build-ups on surfaces of your machines and protects painting surface. The protection cover material with special lining is also scratch free for maximum protection. They are available for DUCATI 999/998, MV AGUSTA F4 and many other super sports models. They are available for DUCATI, MV AGUSTA, BMW and UNIVERSAL for all super sports models.

ALUMINIUM REAR STAND (MONO ARM)

Especially designed for single rear swing arm, the all aluminum made stand weighs only 5kg. The wheels hubs can be customized to match your DUCATI or MV. The stand is equipped with caster wheels for an easy one step operation.

ALUMINIUM REAR STAND (SWING ARM)

Light weight aluminum rear stand is used as standard equipment for DUCATI MOTO GP Team. Weighing only 2.8kg with caster wheels, the stand can be easily operated by a single person. Comes in MOTO CORSE original anodized finish.
